### Attention: Pharmacy Benefit Update

#### **New Abrysvo® Benefit for Pregnant Members**

**Effective June 1, 2026, eligible pregnant members can obtain Abrysvo® (RSV vaccine) through their outpatient pharmacy benefit with a prescription from their healthcare provider.**

Patients may use a participating community pharmacy to obtain and receive the vaccine under the outpatient pharmacy benefit.

This new benefit provides an additional access point for maternal RSV vaccination and may help patients receive protection for their newborn before delivery.

Abrysvo® may be administered during 32–36 weeks of pregnancy to help protect newborns from respiratory syncytial virus (RSV) during their first months of life.
