CDC Health Advisory

The Centers for Disease Control and Prevention (CDC) is issuing a Health Alert Network (HAN) Health Advisory to notify clinicians and health departments about the occurrence and human-to-human transmission of **Clade I Monkeypox virus (MPXV)** in the Democratic Republic of the Congo (DRC).

While the current risk in the United States and specifically Texas is currently **low**, healthcare professionals should remain vigilant for patients exhibiting symptoms consistent with mpox, particularly those with recent travel history to the DRC.

This advisory coincides with a recent surge in cases, both in Texas and other U.S. states. Approximately 16% of reported Texas mpox cases have occurred within the last month.

CPAN's Mental Health Resource Assistance

The Child Psychiatry Access Network (CPAN) offers support to clinicians, who are seeking assistance for their young patients, up to 23 years old, regarding their mental and behavioral health.

Services encompass peer-to-peer curbside consultation and aid in resource location for children and youth patients at **no-cost**.
