Please submit prior authorization requests online at [www.dhpproviderportal.com](http://www.dhpproviderportal.com) or fax to 1-866-741-5650.

All services must be medically indicated, evidenced by supporting clinical documentation.

Admission notification and prior authorization request is required within one business day of admission unless otherwise noted below or on the DHP Authorization Requirement Website at <https://driscollhealthplan.com/priorauthcheck>. Prior authorization requests will not be accepted after a claim has been submitted.

COB: Authorization is required for inpatient services and observation services (greater than 2 days) regardless of if DHP is secondary payer. Some outpatient services/procedure codes may require prior authorization regardless of DHP as secondary payer. Providers should verify authorization requirements on the DHP Authorization Requirement Website at <https://driscollhealthplan.com/priorauthcheck>. In cases where DHP is secondary payer and no prior authorization is required, as based on directive within the DHP Authorization Requirement Website, providers should verify the services are a covered benefit by the primary payer. If the services are known to be a non-covered benefit by the primary payer, prior authorization is required by DHP and proof of non-coverage of benefit must accompany the claim submission. If this is the case, providers should submit prior authorization requests via fax and indicate on the cover page service is a non-covered benefit or over the benefit limit for primary payer. Requests for services which are not a benefit or exceed the allowed limit will be reviewed on a case-by-case basis to determine medical necessity. Prior Authorization requests received after hours or during holiday closures will be processed with a start date of the following business day. Office-based procedures rendered during extended hours will be processed with a start date of date of service, provided requests are submitted to DHP within one business day.

Elective surgical procedures unrelated to the primary reason for admission will require a prior authorization. Unless otherwise specified below, all out-of-network services require prior authorization.

Unless otherwise specified below, authorization is required for ALL services which are either not a benefit or exceed the allowed benefit. These types of requests will be reviewed on a case-by-case basis to determine medical necessity.
